Assistance Center (PTAC)

The background of the top half of the slide is a photograph of the Wisconsin State Capitol building at dusk. The building is a large, white, neoclassical structure with a prominent green copper dome. It is illuminated by warm interior and exterior lights, contrasting with the cool blue of the twilight sky. Trees with autumn foliage are visible in the foreground and to the sides.

**CPARS** Contractor Performance Assessment Reporting System

HOME ACCESS INFO CONTACTS FAQs GUIDANCE RELEASE HISTORY RELATED LINKS SYSTEM REQUIREMENTS TRAINING

*The July 2014 CPARS Merge did not change how the PPIRS compliance metrics are calculated - the calculation continues to require an evaluation to be completed 485 days after the Contract Award Date. However, the contractor now has 60 days to review/comment on the evaluation. This means that if the Assessing Official does not initiate the evaluation until 426 days after the Contract Award Date (i.e., 1 year plus 61 days after the Contract Award Date), there is the potential that the entire evaluation process will not be completed by day 485 and thus the contract/order will be listed as non-compliant on the PPIRS compliance metrics.*

CPARS hosts a suite of web-enabled applications that are used to document contractor and grantee performance information that is required by Federal Regulations.

FAR Part 42 identifies requirements for documenting contractor performance assessments and evaluations for systems, non-systems, architect-engineer, and construction acquisitions. FAR Part 42 also requires documenting additional contractor performance information in the Federal Awardee Performance & Integrity Information System (FAPIS), including Terminations for Cause or Default, DoD Determination of Contractor Fault and Defective Cost or Pricing Data and to make the information available in the Past Performance Information Retrieval System (PPIRS).

FAR Part 9 identifies requirements for Contracting Officers to enter Determinations of Non-Responsibility in FAPIS. The Grant Community is also required to utilize FAPIS to document Terminations for Material Failure to Comply and Recipient Not Qualified Determinations.

**Providing Information for Best Value Awards!**

Welcome to the Past Performance Information Retrieval System (PPIRS). All data in PPIRS is classified as Source Selection Sensitive and is not releasable unless directed by the agency who submitted the data. This policy is in accordance with under the direction of Office of Federal Procurement Policy (OFPP) in the Office of Management and Budget (OMB) [FAR 42.1503\(4\)\(d\)](#)

In May 2010, PPIRS was designated as the government wide single repository of past performance data. Confidence in a prospective contractor's ability to satisfactorily perform contract requirements is an important factor in making best value decisions in the acquisition of goods and services. PPIRS consists of two components, Report Card (RC) and Federal Awardee Performance and Integrity Information System (FAPIIS). These three components support the Federal Acquisition Regulation (FAR) requirement to consider past performance information prior to making a contract award (FAR Parts 9, 13, 15, 36 and 42).

Government access is restricted to those individuals who are working on source selections, to include contractor responsibility determinations. Contractors may view only their own data. A contractor must be registered in the "System for Award Management" (SAM) system and must have created a Marketing Partner Identification Number (MPIN) in the SAM profile to access their PPIRS information.

Access to FAPIIS is granted when approved for access to PPIRS-RC. PPIRS RC and FAPIIS are sponsored by General Services Administration (GSA) and Integrated Award Environment (IAE).

Effective July 1, 2009, the FAR requires federal agencies to post all contractor performance evaluations in PPIRS.

In May, 2010, the Office of Federal Procurement Policy (OFPP) and the Acquisition Committee for eGovernment (ACE) determined that the Defense (DoD) Contractor Performance Assessment Reporting System (CPARS) will be utilized as the single past performance reporting system federal-wide to collect and transmit performance evaluations to PPIRS. Further, no new systems will be built. Agencies should not invest any resources into developing or improving a capability for past performance reporting. This decision was based on NIH's retirement of CPS, the on-going efforts to establish a standard method and criteria for conducting past performance reporting, and the recent implementation of Federal Awardee Performance and Integrity Information System (FAPIIS) which already requires Agency use of CPARS as the data entry module.

Search Instructions: Search by DUNS, CAGE, or by selecting a filter from the dropdown box. NOTE: If you enter multiple search criteria, the DUNS code will take precedence.

CAGE or DUNS/DUNSPLUS4 searches must be exact. CAGE must be 5 characters; DUNS must be either 9 or 13 characters.

Special Search Note: It is possible in the FAPIIS application that a contractor may not have a CAGE CODE. If you search by CAGE and do not get the contractor you are looking for, try again using the 'Name' search option. Note some of the Extended Systems do not require DUNS. If your search of the FAPIIS system does not produce a Performance Information section of SAM record, you can go directly to the System for Award Management (SAM) <https://www.sam.gov/> and use the 'Advanced Search' option to locate the entity of interest.

To search for an individual by name, search using the 'Contains' option and specify *only* the person's last name.

On August 15, 2015, PPIRS underwent a split of its two modules, Report Card (RC) and Statistical Reporting (SR). RC kept the same URL for its main web page and login, so RC users were generally unaffected. SR split off to its own URL for access along with a separate website. SR users will need to access using the new URL and website. If you have both RC and SR access, you will still need to use the new SR URL or website to login.
