

INTERNET SECURITY WISCONSIN 2015

We now live in a world that is more connected than ever before. The Internet touches almost all aspects of everyone’s daily life, whether we realize it or not. Recognizing the importance of cybersecurity to our nation, October has been designated as **National Cyber Security Awareness Month**.

Cybersecurity must become a priority for every business and every cybercriminals, theft of intellectual property, financial or employee information as well as loss of personal financial, health and com-works pose economic and national security threats.

Protection must be proactive and must include all personal and the use of cell phones, tables, and laptops. If a breach does occur – as collaboration with law enforcement.

individual. We all face cybersecurity challenges such as being the target of information stolen resulting in business disruption, loss of clients and client puter documents. Intrusions into America’s business and infrastructure net-

business devices – the line between personal and business has blurred with a plan should be in place that includes quick response and recovery as well

The **InterSecWI 2015** program was designed to engage and educate public and private sector partners with the goal of raising awareness and understanding of cybersecurity. Speakers will address identifying threats and solutions for securing and protecting your data as well as improving your resiliency if your data is compromised.
