

Milwaukee County Transit (MCTS)

The Milwaukee County Transit System (MCTS) has grown from a single horse-drawn streetcar in 1860 to the largest transit system in Wisconsin and the economic engine of Southeastern Wisconsin. With a fleet of 410 diesel buses and a dedicated team of 1,100 operators, mechanics and administrative staff, MCTS provides on average 150,000 rides every day to people across Milwaukee, Ozaukee, Washington and Waukesha Counties who rely on us to get to work, school and medical appointments.

Milwaukee Transport Services, Inc. is a quasi-governmental instrumentality of Milwaukee County responsible for the management and operation of the Milwaukee County Transit System.
